A method for provisioning resources to a user during a meeting with another user, each user having an associated computing device is provided. The method may include detecting a meeting of a first user with a second user, each of the first and second users having an associated computing device. The method may further include obtaining historical data relating to previous activity of at least one of the first and second users during one or more earlier meetings between the first and second users. The method may further include provisioning one or more resources to at least one of the first and second users based on the obtained historical data associated with the one or more earlier meetings.
